

I encourage you to support Low Power FM Broadcasting.
When members of local communities support each other by offering
a variety of media programming, all benefit.
In San Diego I feel lucky to be able to listen to Free Radio San
Diego and 106.9 fm which have a diverse, locally focused content. There is even
a christian show on sunday mornings!
Protect the commons, protect the airwaves, protect freedom of expression,
protect the FM signal; allow more Low Power FM Stations to exist and thrive.
Low Power FM is good!
Say it with me out loud, Low Power FM is GOOD!
